

KUNDALINI PRESENTS "VICEVERSA"**Design: Noé Duchaufour-Lawrance, 2020**

Noé Duchaufour Lawrance brings nature into the heart of the light and designs Viceversa for Kundalini. A simple rotation and the suspended lamp suddenly makes space for plant elements. By freely juxtaposing several lamps, available in the single or double version, dreamlike and bright vertical gardens take shape. Scenes of greenery and light in constant change, that give movement and breath to diverse environments. Together with Viceversa, the space and those who live there are reconnected with nature, which in the designer's vision is memory, roots and dreams. The sculptural design of the coloured blown glass diffuser is enhanced by the painted metal structure.

Suspension lamp. Diffuser made of mouth blown glass and metallic structure.

Dimensions	Viceversa: L 26 x W 23 x H 69 cm Viceversa 2: L 26 x W 23 x H 139 cm

Feeding	220-240 / 120 V

Designer: Noé Duchaufour-Lawrance

Noé Duchaufour Lawrance considers each project like an organic form which grows with its user. He does not limit himself in the projects that he develops, as ready to design objects for inspired lines for design manufacturers as to compose harmonious living areas as well as to define the image of a product or a showcase for a famous brand. He refers not only to the universal character of nature to impose forms which make sense but in addition states that the concept of total art is henceforth fundamental to contemporary creation. Noé designed for Kundalini Peacock in 2013 and Viceversa in 2020.
