**IP55**  
wall lamp, 2026  
design Francesca Smiraglia

**IP55** by **Francesca Smiraglia**. A blown-glass cushion leaning against the wall. Its glossy profile captures unexpected reflections, while its flattened shape generates a constantly renewed perception. Born to endure, designed to belong: protected from dust and water, it finds its place in any space that calls for light. A small sculptural object that brings its presence wherever architecture invites it.

Dimensions	ø 17 x W 10.2 cm
Materials	Painted metal structure with IP55 protection rating. Polished opal blown glass diffuser.
Colours	Black, Brass
Bulbs	Board Led 1x7.7W 2700 K – 1092 lm – CRI>90
Feeding	220-240/120 V

**Designer's Biography: Francesca Smiraglia**

Francesca Smiraglia graduated in 2008 in Industrial Design at the Politecnico di Milano with a specialization in Product and Lighting Design. She lives and works in Milan. She is always constantly looking for ways to improve her knowledge and develop new methodologies of *design thinking*; her training begins with product development of furniture and lighting fixtures and then she focus her job on *lighting design* to achieve greater awareness of "light". She currently works as *lighting designer*, mainly in the field of *interior design, retail e hospitality* and also as a product designer, in particular thinking of product that explore the conceptual and anthropological sphere, processing the formal aesthetics of the products focused on the interaction with them and their functionality.

Milan, Januray 2026
